

Building Effective SMEs with Affordable Integrated Business Software

Friday, 13 November 2009, KUCHING:- Small medium enterprises (SMEs) in Sarawak are now able to invest in affordable integrated business software to help manage their business operations more efficiently and effectively.

SMEs in Sarawak are faced with different kind of challenges in view of the relatively small population in the state. For Sarawak SMEs who do not export their products and services beyond Sarawak state, they definitely are facing limited market which may impact their ability to grow. However, they nevertheless have the desire to have efficiencies and visibility in their operations. Unfortunately, this desire will require investments in tools and skills. Such tools will obviously in the form of an integrated and well proven business software.

FIS™ (Financial Information Systems) enables companies to empower their employees to contribute business efficiencies by streamlining and integrating various key business processes into one complete information and interactive service platform for accurate and quick decision making. It is an affordable, ready-made integrated business software which can be deployed for immediate implementation. The existence of the FIS engine means that the software is able to be customized to meet specific needs of different companies.

FIS™ comprises of 14 modules which provide support to core business operations of any companies:

- General Ledger System (FIS™ Core)
- Account Receivable Systems (FIS™ Core)
- Account Payable Systems (FIS™ Core)
- Cash Management Systems (CAMS)

- Budgetary Control System (BUCS)
- Inventory Management System (IMAS)
- Deposit Monitoring System (DEMOS)
- Fixed Asset Management System (FAMAS)
- Purchasing System (PURSE)
- Human Resource Management System (HRMS)
- Employee Time Attendance System
- Payroll Management System (PAYMAS)
- Loan System (LOANS)
- Sales
- Distribution

One of the many advantages when using FIS™ is that it caters for multi-users as well as multi-companies such that it makes it easier for data integration across different users and companies.

Other features include comprehensive security system, secure data management, preview and export features, comprehensive search utilities, flexible integration between modules and real-time account posting.

FIS™ is an integrated business software which uses Microsoft SQL Server database and adopts an award winning open client-server development tools that are integrated with industry standard Web Services, ODBS and XML. The product is positioned for growing and midsize businesses. It has the capacity to support up to 1,000 users while the Payroll is compliant with the Malaysian payroll system, tax and statutory requirements.
